

PAPER ROUTE

Your parents have agreed to let you take on a paper route. The deal is that you cannot work more than 3 hours a week as your parents are worried your school work will suffer.

There are 4 paper routes available. Some of these routes require you to deliver flyers along with the paper.

Number of Papers	Number of Flyers	Frequency	Length of Time
98	0	Once a week	1 hour, 30 minutes
54	54	Twice a week	1 hour, 15 minutes each day
75	0	Twice a week	2 hours each day
80	160	Once a week	1 hour, 20 minutes

The newspaper company will pay you \$0.23 for each paper you deliver. The flyer company will pay you \$0.04 for each flyer you deliver.

Which route (s) would be the best choice for you in order to make the most money while still staying under the 3 hour/week limit your parents have set?
